Build digital workflows with a broad set of quality applications

ETQ Reliance Go includes the ETQ core QMS and nonconformance handling applications, giving you the building blocks for a comprehensive closed-loop quality ecosystem.

Document control

Manage the life cycle of all controlled documents in a centralized framework and automatically track revision history.

Training Management

Keep a 360-degree view of the employee training matrix, manage courses and assignments, and track progress and compliance.

Audits Management

Stress free audit-readiness with a comprehensive planning structure that streamlines scheduling, assigning, conducting, and reporting on audits.

Corrective & Preventive Action

Identify and address the root cause of high-risk quality and safety issues. Manage action items for internal and external stakeholders.

Change Management

Evaluate risks, create action plans, and reduce cycle time when making changes to engineering, processes, specifications, and suppliers.

Suppliers, Materials & Chemicals

Central repository of supplier information that can share data with all applications on the ETQ Reliance platform.

Quality Events

A versatile cross-functional app that helps you track, trend, or investigate any quality or safety issue and determine whether a formal CAPA is needed

Nonconformance Reporting

Mitigate costs of poor quality with a process to control and isolate nonconforming materials, identify sources, and eliminate occurrences of nonconforming products.

Inspection Management

Identify quality and safety issues sooner and resolve them faster through centralized planning and execution of QC in-process inspections.

Customer Feedback

Integrate customer feedback into the nonconformance handling process to support continuous improvement.

Risk Register

Create matrix-style assessments to identify and control all risks that may affect your organization. nonconforming products.

Centralized Reporting & Alerts

Easy data visualization and trend notifications. Automate email notifications based on defined thresholds.

Administration Center

Centralized area to maintain all of the management controls of ETQ Reliance, including user profiles, master keyword lists, decision trees, times zones, and more.

Service Care 360 provides a personal touch

The Service Care 360 plan is designed to support your efforts towards a successful and long-term quality program for a low fixed cost. .
